

JLG Forklift Part

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora started out on a cross country journey in their RV. Freshly retired, after spending several years working with his brother to build their crane company into an industry leader, John had no idea that fateful trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road expedition.

All through their trip, John reacquainted himself with past business connections along the way. In combination with these conversations and a significant event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered an infinite market for a product that could swiftly and safely elevate people in the air to accomplish upkeep and other construction services.

After returning from their vacation, John set up a business with two of his friends and purchased a metal fabricating company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they produced and sold their first JLG aerial work platform in 1970. The company incorporates many of the basic design essentials of that original lift into current designs.

JLG lift trucks have come a long way since Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. These days, the company proudly continues to expand itself into numerous marketplaces worldwide and develops new products to make certain consumers are capable of being more effective and perform in the workplace within a safer atmosphere.
