

Barrel Clamps

Barrel Clamp - A Barrel Clamp is really a mechanical or hydraulic attachment designed for a lift truck. It can be utilized to grip the object you would like to transport utilizing the forklift and is typically utilized for handling paper rolls, barrels, and kegs. Several designs of barrel clamp attachments even have a rotate function. For instance, the revolving function enables a lift truck operator to be able to slot in a vertically stored paper into the horizontal intake of a printing press.
