

Pulp Clamp

Pulp Clamp - There is a wide range of forklift attachments available in order to make the equipment more efficient. A snowplow attachment can be mounted to the front part of the lift truck. A scoop bucket could be useful whenever the job requires transferring gravel, snow, sand, or soil. A double block handler allows the forklift operator to lift\carry two loads and afterward pile them side-by-side. Many of those accessories are really great for light to medium duty work.

One of the forklift attachments, called a package lift clamp, permits for the transferring and carrying of heavier pallets. Pallet crane forks are also used so as to transfer and carry pallets by utilizing an overhead crane. A drum clamp attachment is helpful for transferring very heavy drums from one place to another without having to use a pallet. Forklift mounted hoppers permit materials to be transferred and dumped without having to handle it by hand. These hoppers when the bumper is released are self dumping.

There are also attachments accessible which could transform the forklift into a commercial broom or mop. Those attachments are perfect for cleaning boat docks, warehouse floors and parking areas. Lift truck mounted platforms are available equipped with dual entry doors and can be attached to be able to transport staff from one locale to another. The mounted platform accessory is nice for reaching areas which are difficult to access, particularly when you have merchandise or things stored in out of the way locations or way up high.

It is a versatile choice to install lift truck attachments that could immediately transform a forklift truck right into a mobile crane unit. This equipment is extremely helpful when it comes to moving loads that can be uneven or awkward. This attachment can either be telescopic, mounted on the carriage itself, or be fixed or even forklift mounted.
