

Toyota Forklift Parts

Toyota Forklift Part - In the U.S., Toyota Materials Handling inc., or TMHU, has been the top selling lift truck provider since 1992. This company has been situated out of Irvine, California for well over 40 years, providing a wide-ranging line of quality lift trucks. With a distinguished reputation of resilience and reliability, Toyota lift trucks have thrived in the competitive materials handling market. Quality is the keystone of Toyota's notorious Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S.A are manufactured here.

All Toyota's manufacturing facilities within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. The Columbus TIEM plant has been honored on many occasions for its dedication to relentless improvement and its environmentally friendly systems. It is the first and only manufacturer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift vehicles emit 70 percent fewer smog forming emissions than the existing federal EPA standards and have complied with California's strict emission standards and policies.

Toyota Material Handling, U.S.A. - The Industry Leader

Brett Wood, President of TMHU, associates Toyota's achievement to its strong dedication to manufacture the finest quality lift trucks while delivering the utmost client service and support. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, often known as TICO, is listed in Fortune Magazine as the world's leading lift truck supplier and is amongst the magazines celebrated World's Most Admired Companies.

New Meaning to Environmental Responsibility

Toyota's parent company, Toyota Industries Corporation, has imparted an outstanding corporate values towards environmental management within Toyota. Toyota's loaded history of environmental protection whilst retaining economic viability cannot be matched by other organizations and certainly no other resource handling manufacturer can so far rival Toyota. Environmental accountability is an important feature of corporate decision making at Toyota and they are proud to be the first and only producer to provide UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift trucks. Yet one more reason they remain a leader within the industry.

In 2006, Toyota released the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission standards, and also meets California's more involved 2010 emission standards. The finished invention is a lift vehicle that produces 70 percent fewer smog forming emissions than the current Federal standards allow.

Furthermore in 2006, Toyota developed an affiliation with the Arbor Day Foundation, furthering their obligation to the environment. Greater than 57,000 trees have been planted in local parks and national forests damaged by ecological causes such as fires, as a result of this relationship. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's network of sellers to non-profit organizations and neighborhood customers to help sustain communities all over the U.S.

Toyota's lift trucks offer better durability, visibility, efficiency, ergonomics, and all the leading safety equipment that has made Toyota an industry leader. The company's System of Active Stability, also called "SAS", helps reduce the risk of mishaps and injuries, in addition to increasing productivity levels while minimizing the potential for product and equipment damage.

System Active Stability senses numerous elements that might lead to lateral instability and potential lateral overturn. When one of those factors are detected, SAS immediately engages the Swing Lock Cylinder to stabilize the rear axle. This changes the lift truck's stability footprint from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the probability of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to prevent injuries or accidents while adding durability.

The SAS systems were originally utilized on the 7-Series internal combustion lift vehicles which were put on the market in 1999. These systems helped push Toyota into the lead for industry safety standards. Now, SAS is utilized on almost every modern internal combustion products and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift vehicles in operation, exceeding 450 million hours combined. The increased population of SAS-equipped trucks in the field, along with required operator education, overturn fatalities across all designs have decreased by 13.6% since 1999. Furthermore, there have been an overall 35.5% fall in industry wide collisions, loss of control, falls and overturn from a lift vehicle for the same period.

Toyota's pattern of brilliance reaches far beyond its technological achievements. The company maintains an extensive Operator Safety Training course to help users meet OSHA standard 1910.178. Training courses, videos and various materials, covering a wide scope of subjects-from individual safety, to OSHA policies, to surface and load conditions, are available through the vendor network.

Toyota has sustained a continuous existence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, produced its 350,000th lift truck. This fact is demonstrated by the statistic that 99% of Toyota lift trucks bought in America at the moment are built in the United States.

Situated in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities across 126 acres.

Facilities include a National Customer Center, as well as manufacturing operations and supply centers for equipment and service parts, with the whole investment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both dealers and consumers of TMHU. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an area for live product demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its originator, Sakichi Toyoda, in 1867, and lastly a instruction center.

TMHU has 68 sanctioned industrial equipment dealers, along with 189 dealership locations throughout the United States, offering the most complete and inclusive consumer support and customer service in the industry. The company's new and Certified Used lift trucks, service, parts, and financing capabilities make Toyota dealerships a one-stop shop to ensure total consumer satisfaction.
